

Technological Innovation

■ Driving the Future with Innovation

- AI & Automation ■ – From chatbots to self-driving cars
- FinTech ■ – Mobile payments, digital wallets (ex: GCash, PayPal)
- HealthTech ■ – Telemedicine & wearable devices
- Green Tech ■ – Renewable energy & sustainable design

■ Example: Elon Musk (Tesla, SpaceX) → pushing boundaries in space travel & clean energy

Challenges & Opportunities in Technopreneurship

■■■ Balancing Risks & Rewards

■■■ Challenges	
Funding ■	Startups need capital
Competition ■	Global vs local players
Tech adaptation ■	Some resist new tools
Cybersecurity ■	Protecting data

■ Opportunities	
Scalability ■	Tech businesses can expand globally
Accessibility ■	Reach customers anywhere, anytime
Innovation edge ■	Solve real-world problems uniquely
Government support ■■	Programs, startup incubators, training

■ Example: Grab (started in Malaysia → now SEA-wide), Kumu (Filipino live-streaming app)

Social Impact of Technopreneurship

■ Beyond Profit – Changing Society

■ Positive Impacts	■ Negative Impacts
Job creation ■■■■■■	Job displacement (automation replacing workers)
Better services (online education, Telemedicine)	Digital divide (tech gap between rich & poor)
Inclusion (microfinancing apps for rural areas)	Privacy concerns (data misuse)

■ Example: Uber/Grab → new income sources for drivers; TikTok/YouTube → student entrepreneurs earning online.
